Expiration Date: **DRAFT**

I. OPERATION DESCRIPTION

Applicant/Owner/Permittee:	SLT Construction Corporation
Mailing Address:	3 Marion Drive Carver, MA 02330
Operation:	SLT Construction Corporation
Operation Address:	0 Spring Street Plympton, MA 02367
Type of Operation:	Solid Waste Recycling Operation
Type of Material Handled:	Source Separated Asphalt, Brick, And Concrete
Amount and Type of Recyclable Materials Accepted:	250 tons per day of Asphalt, Brick, And Concrete

This information is available in alternate format. Please contact Melixza Esenyie at 617-626-1282.

Application

Application: BWP SW 46: Permit for a Recycling, Composting or Conversion Operation
Application: 22-SW46A/47A-0004-APP
Prepared By: Green Seal Environmental, LLC
Dated: May 2022

Recycling, Composting or Conversion Permit

The Massachusetts Department of Environmental Protection (“MassDEP”), as a result of its review of the subject permit application (the “Application”), has determined that the proposed source separated recycling operation constitutes a Recycling Operation and hereby issues this decision (hereinafter referred to as the “Permit”) pursuant to the provisions and requirements established at 310 CMR 16.05: *Permit for Recycling, Composting and Conversion Operations*. Provided that the Recycling Operation is conducted in accordance with the applicable solid waste regulatory requirements at 310 CMR 16.05, and criteria and procedures as described in the Application, and provided that the Applicant complies with the terms and conditions in this Permit as imposed by MassDEP pursuant to 310 CMR 16.05(4), the Recycling Operation will not require a solid waste site assignment pursuant to 310 CMR 16.08 (et.seq.), or a solid waste management facility permit pursuant to 310 CMR 19.000.

Be advised that this Permit is subject to the Applicant’s compliance with 310 CMR 16.00 and the terms and conditions of this Permit, pursuant to the provisions and requirements contained at 310 CMR 16.05(4). This Permit does not convey property rights of any sort or any exclusive privilege thereto.

Please also be advised that if this Permit is violated, suspended or rescinded, the Recycling Operation shall be regulated under applicable sections of Massachusetts General Laws (MGL), Chapter 111, Section 150A, and the regulations promulgated there under at 310 CMR 16.00 “Site Assignment Regulations for Solid Waste Facilities,” and 310 CMR 19.000 “Solid Waste Management Facility Regulations.” Failure to comply with these requirements could also lead to legal action that could include but not limited to, criminal prosecution, court imposed civil penalties, or civil administrative penalties assessed by MassDEP.

II. DEFINITIONS

Unless indicated otherwise, the following terms in this Permit shall mean as follows:

Application means and/or refers to the BWP SW 46 – Permit for a Recycling, Composting, or Conversion (“RCC”) Operation, Application 22-SW46A/47A-0004-APP that was submitted to MassDEP on May 11, 2022, for the source separated asphalt, brick and concrete recycling operation at 0 Spring Street in Plympton, Massachusetts, inclusive of supplemental submittals.

Applicant means and/or refers to, for purposes of this Permit, SLT Construction Corporation. (“Owner/Operator”).

Asbestos Waste means pursuant to 310 CMR 19.000, Asbestos-containing Material (“ACM”) and Asbestos-containing Waste Material as defined in 310 CMR 7.00: Air Pollution Control.

Asphalt Pavement, Brick and Concrete means asphalt pavement, brick and concrete (“ABC”) from construction activities and demolition of buildings, roads and bridges and similar sources.

Asphalt Pavement, Brick, and Concrete Rubble means rubble that contains only weathered (cured) asphalt pavement, clay bricks and attached mortar normally used in construction, or concrete that may contain rebar. The rubble shall not be painted, coated or impregnated with any substance. The rubble shall not be mixed with or contaminated by any other wastes or debris.

Board of Health means and/or refers to the Town of Plympton Board of Health.

Construction and Demolition (“C&D”) Waste means the waste building materials and rubble resulting from the construction, remodeling, repair or demolition of buildings, pavements, roads, or other structures. Construction and demolition waste includes but is not limited to, concrete, bricks, asphalt pavement, masonry, plaster, gypsum wallboard, metal, lumber, and wood.

Consultant means and/or refers to, for purposes of this Permit, Ardent Group, Inc. Rockland, MA.

Disposal means the final dumping, landfilling or placement of solid waste into or on any land or water or the combustion of solid waste.

Facility means a site or works, and other appurtenances thereto, which is, has been or will be used for the handling, storage, transfer, processing, treatment, or disposal of solid waste including all land, structures and improvements which are directly related to solid waste activities. For the purpose of this Permit, Facility means the property at 0 Spring Street in Plympton, Massachusetts where the Operation is located, as indicated in the Application.

Handling means processing, storing, transferring, or treating a material or solid waste.

Handling Area means an area used for the transfer, storage, processing or treatment of solid waste, excluding weigh stations or access roads.

Hazardous Material means, pursuant to 310 CMR 19.000, that a hazardous material as defined in 310 CMR 40.0000: *Massachusetts Contingency Plan*. As of October 7, 2005, hazardous material is defined at 310 CMR 40.0000 as follows: material, including, but not limited to, any material in whatever form which, because of its quantity, concentration, chemical, corrosive, flammable, reactive, toxic, infectious or radioactive characteristics, either separately or in combination with any substance or substances, constitutes a present or potential threat to human health, safety, welfare, or to the environment, when improperly stored, treated, transported, disposed of, used, or otherwise managed. The term shall not include oil, but shall include waste oil and all those substances which are included under 42 U.S.C. § 9601(14), but it is not limited to those substances. The term shall also include, but is not limited to, material regulated as hazardous waste or recyclable material under 310 CMR 30.000: Hazardous Waste. Hazardous Waste means any waste that is defined and regulated under 310 CMR 30.000: *Hazardous Waste*

MassDEP and/or the Department means and/or refers to the Massachusetts Department of Environmental Protection.

MDPH means and/or refers to the Massachusetts Department of Public Health.

Metal means, pursuant to 310 CMR 19.000, ferrous and non-ferrous metals derived from used appliances, building materials, industrial equipment, transportation vehicles, and manufacturing processes.

Municipal Solid Waste: means, pursuant to 310 CMR 19.000, any residential or commercial waste.

Operation means and/or refers to the source separated recycling operation as performed by SLT Construction Corporation, 0 Spring Street in Plympton, Massachusetts, and designated as MassDEP Facility ID: 548013

Operator means, pursuant to 310 CMR 16.02, any person who has care, charge or control of a facility, operation or activity subject to 310 CMR 16.00, including without limitation, an agent or lessee of the owner or an independent contractor. The “Operator” for the purpose of this Permit is SLT Construction Corporation.

Owner means any person who alone or in conjunction with others has legal ownership, a leasehold interest, or effective control over real property upon which a facility or operation is located, or the air space above said real property. The “Owner” for the purpose of this Permit is SLT Construction Corporation.

Pre-Sort means to separate from solid waste and to keep separate from solid waste. Pre-sorting does not require the separation of components that are integral to the material (i.e. insulation or electronic components in white goods).

Processing means the use of any method, technique, or process to reduce the volume or alter the physical characteristics of solid waste or recyclable or compostable materials through any means, including, without limitation, separating, baling, shredding, crushing or reworking.

Recyclables or Recyclable Material means material that is pre-sorted and has the potential to be recycled. Recyclable material includes biodegradable paper but does not include:

- a) organic materials that will be composted or converted, or
- b) construction and demolition waste unless it has been separated and kept separate, into the following categories: asphalt pavement, brick, and concrete, wood, metals, plaster and wallboard, roofing materials, and carpet.

Recycle or Recycled means to recover materials or by-products which will be: (a) reused, (b) used as an ingredient or a feedstock in an industrial or manufacturing process to make a marketable product, or (c) used in a particular function or application or as an effective substitute for a commercial product or commodity.

Residual means all waste remaining after treatment or processing. Residual remaining after treatment or processing is not pre-sorted material. Air and water discharges managed in accordance with applicable regulations are not residuals.

Responsible Official means, for the purpose of this Permit, for a corporation: a president secretary, treasurer, or a vice-president of the corporation in charge of a principal business function who has been duly authorized to bind the corporation pursuant to a corporate vote, or a representative of the corporation who has been duly authorized to bind the corporation

pursuant to a corporate vote provided the representative is responsible for the overall operation of the Facility or operation.

Site means, for the purpose of this Permit, the property at 0 Spring Street, Plympton, Massachusetts where the Operation is located, as indicated in the Application.

Solid Waste means, any useless, unwanted or discarded solid, liquid or contained gaseous material resulting from industrial, commercial, mining, agricultural, municipal or household activities that is disposed or is stored, treated, processed or transferred pending such disposal, but does not include:

- (a) hazardous waste as defined and regulated pursuant to 310 CMR 30.000: *Hazardous Waste*;
- (b) sludge or septage which is land applied in compliance with 310 CMR 32.00: *Land Application of Sludge and Septage*;
- (c) waste-water treatment facility residuals and sludge ash from either publicly or privately owned waste-water treatment facilities that treat only sewage and which is treated and/or disposed at a site regulated pursuant to M.G.L. c.83, §§ 6 and 7 and/or M.G.L. c.21, §§ 26 through 53 and the regulations promulgated thereunder, unless the waste-water treatment residuals and/or sludge ash are co-disposed with solid waste;
- (d) septage and sewage as defined and regulated pursuant to 314 CMR 5.00; *Ground Water Discharge Permit Program*, and regulated pursuant to M.G.L. c.21, §§ 26 through 53 or 310 CMR 15.00: *The State Environmental Code, Title 5: Standard Requirements for the Siting, Construction, Inspection, Upgrade and Expansion of On-site Sewage Treatment and Disposal Systems and/or for the Transport and Disposal of Septage*, provided that 310 CMR 16.00 does not apply to solid waste management facilities which co-dispose septage and sewage with solid waste;
- (e) ash produced from the combustion of coal when reused as prescribed pursuant to M.G.L. c.111, § 150A;
- (f) solid or dissolved materials in irrigation return flows;
- (g) source, special nuclear or by-product material as defined by the Atomic Energy Act of 1954;
- (h) materials and by-products generated from and reused within an original manufacturing process;
- (i) materials which are recycled, composted, or converted in compliance with 310 CMR 16.03, 16.04 or 16.05; and
- (j) organic material when handled at a Publicly Owned Treatment Works as defined in 314 CMR 12.00: *Operation and Maintenance and Pretreatment Standards for Wastewater Treatment Works and Indirect Dischargers* and as approved by the Department pursuant to 314 CMR 12.00: *Operation and Maintenance and Pretreatment Standards for Wastewater Treatment Works and Indirect Dischargers*.

Source-Separated means separated from solid waste at the point of generation and kept separate from solid waste. Source separated does not require the separation of components that are integral to that material.

Storage means the temporary containment of a material or solid waste in a manner which does not constitute disposal.

Waste Bans means items banned from disposal or transfer for disposal pursuant to 310 CMR 19.017. Asphalt pavement, brick and concrete is a waste ban item.

Wetlands mean any land or water are subject to M.G.L c. 131 § 40 or resource areas regulated pursuant to 310 CMR 10.000: Wetlands Protection.

III. APPLICATION REVIEW & PROJECT DESCRIPTION

Application

The Owner is requesting MassDEP approval for its Application to commence its proposed recycling operations at the Site under an RCC Permit. The type of materials proposed to be accepted for recycling purposes consists solely of clean asphalt, brick and concrete rubble (“ABC”) materials. The Owner anticipates accepting up to 80,000 tons of clean ABC on an annual basis which equates to an approximate daily maximum of no more than 250 tons per day. A maximum of 18,000 tons gross unprocessed and processed material is permitted to be stored on-site at one time. Under the current Massachusetts Solid Waste Regulations, 310 CMR 16.05, facilities that wish to conduct ABC recycling operations that do not meet the site assignment exemptions under 310 CMR 16.03 (i.e., Site is an active sand and gravel pit) and General Permit requirements under 310 CMR 16.04 may conduct those operations under an RCC Permit. Since the recycling operations do not qualify for an exemption or meet General Permit requirements, the Owner has submitted the required application materials to obtain an RCC Permit.

The Application, prepared and submitted by the Consultant, was received by MassDEP on May 11, 2022. The Application was submitted as a permit application category BWP SW 46, Permit for a Recycling, Composting, or Conversion Operation, Application Number: 22-SW46A/47A-0004. In accordance with 310 CMR 16.05(2)(a), a pre-application meeting was held on March 22, 2022 conducted via teleconference with the MassDEP, Consultant and Owner to discuss the project and elements of the RCC Permit Application process.

Supplemental Information

The Consultant provided additional information in response to comments from MassDEP which included the following:

- October 17, 2022 – Information provided to MassDEP in response to MassDEP comments provided on September 28, 2022.

Existing Facility

The Site, located at 0 Spring Street in Plympton, MA, immediately east of the intersection of State Highway Route 44 and Spring Street on the border of Plympton and Carver, and has been the location of an active sand and gravel mining operation. The entire Site is located on two (2) continuous parcels of land owned by RPBP, LLC with a total acreage of 24.3 acres. The larger northern parcel is located entirely within the Town of Plympton and is approximately 23.4 acres of land. All RCC operations are currently planned to

occur on this parcel. The southern parcel is located within the Town of Carver and will be utilized by SLT solely for Site ingress and egress.

According to the latest Town of Plympton Zoning Map dated May 5, 2015, the Site is located within General Industrial Zone (I) of Plympton. The Site bordered by Route 44 to the north and west, solar farms to the east and south, and Ricketts Pond and Ricketts Pond Business Park (under development) to the South. The Site is bisected by an 80-foot utility easement that runs north to south on the easterly portion of the Site.

The Applicant has identified the following receptors associated with the proposed recycling operations:

- Northern portion of the Site contains approximately 50,200 square feet of wetlands and associated buffer zone
- Two manmade detention ponds located 250 feet east and 650 feet north of the proposed ABC recycling area.
- Ricketts Pond is located approximately 650 feet south of the proposed recycling area.
- Northern portion of the Site is partially located within a Zone II associated with a well located 1,800 feet northwest of the Site.
- The closest residential property is located over 815 feet to the east of the proposed recycling operations in the Town of Kingston.

Receptors

Residential areas exist in the vicinity of the Site to the east and southeast in the Town of Kingston and south of Ricketts Pond in the Town of Carver. Businesses and Route 44 are located to the north, northwest and southwest of the Site.

The closest public water supply well is a non-transient non-community (NTNC) water system is located 2,000 feet northwest of the proposed recycling area and is operated by the Sysco Boston LLC. A mapped Zone II associated with this well traverses a narrow section of the north-eastern portion of the Site. The proposed ABC recycling operations is not located within the Zone II contribution area to this well.

A NTNC water system operated by LiteControl Co. is located approximately 2,600 feet west of the proposed recycling area, with a mapped Interim Wellhead Protection Area (IWPA) and Zone I.

A Town of Kingston municipal well is located approximately 4,100 feet to the northeast of the proposed recycling area.

The closest private drinking water well is located approximately 1,350 feet to the south of the proposed recycling area.

The closest residential property is located approximately 815 feet east of the proposed recycling area in the Town of Kingston. This residential neighborhood has public drinking water supplied by the Town of Kingston.

Proposed Operation

The proposed recycling operations are situated immediately east of the intersection of State Highway Route 44 and Spring Street on the border of Plympton and Carver in Massachusetts. ABC materials are proposed to be accepted at the Site at a maximum rate of 250 tons per day on average annually and 80,000 tons per year and a maximum of 18,000 tons gross unprocessed and processed material stored on-site at one time.

Operating hours for the facility will be Monday through Friday from 7:00 am to 5:00 pm and Saturday from 7:00 am to 1:00 pm, excluding holidays. When the facility is closed and no SLT personnel are on-site, the facility gate will be locked, and all keys removed from equipment.

The processing of ABC materials will be conducted as needed throughout the year. The Owner anticipates stockpiling of three (3) source separate stockpiles up to 1,500 cubic yards (“cy”) of unprocessed asphalt, brick, and concrete and three (3) source separate stockpiles up to 1,500 cy of processed asphalt, brick, and concrete that will be approximately 15 feet in height and a slope of about three horizontal to one vertical (3H:1V). The processed ABC material will be comprised of a 6 inch minus crushed asphalt, brick, or concrete. Materials will be kept separate throughout the intake, stockpiling, and crushing process to generate a final product consisting solely of crushed asphalt, brick, or concrete, free of other materials. Tracking the quantities of material in the stockpile will occur by either measuring the heights and base of the piles and/or through the use of SLT Construction’s GPS survey and/or drone capabilities. The survey data along with the inbound and outbound tonnage receipts can be used to establish a waste density and provide SLT Construction additional means of estimating on-site volumes and maintaining on-site material quantities.

Any incidental debris is encountered, will be separated out and stored in roll-off containers for proper disposal. Rebar, concrete mesh, and other metals will be collected by the crushers’ scrap magnets and stored for recycling.

As required, the Owner proposes to use only clean, source separated ABC materials in its recycling operations. SLT Construction personnel will be responsible for ensuring that the clean ABC will be free of paints, coatings and asbestos and other unacceptable materials. To facilitate this, ABC materials will be inspected at the point of generation prior to being loaded and transported to the Facility. Upon arrival at the Facility, the ABC loads will again be visually inspected from a raised platform for unacceptable material. If unacceptable material is identified, the material will be diverted to the appropriate waste pile or container for future disposal.

The Owner will have personnel at the facility trained in the identification of suspect asbestos containing material and other hazardous materials. The trained personnel should a Certificate of Completion issued by a DLS certified Asbestos Training Provider for having successfully completed the Initial Asbestos Inspector training as specified in 453 CMR 6.10(4)(d) and/or a Certificate of Completion for the current 12-month period issued by a DLS certified Asbestos Training Provider for having successfully completed the Annual Refresher Asbestos Inspector training as specified in 453 CMR 6.10(5). Any questionable loads, in which a determination

regarding the presence of prohibited materials cannot be confidently reached, will be rejected. Loads with materials sourced from demolition jobs subject to MassDEP AQ-06 are brought to the facility, the notification form and supporting documents will be required for acceptance.

In order to prevent public nuisances such as odors, vectors, dust and noise, the Owner will implement several environmental control/contingencies as part of their proposed recycling operations. Odors and vectors are not anticipated to be problematic as ABC is not odorous nor does it provide any attraction for vectors. In the unlikely event that vectors are identified, the Owner will contract with a pest control contractor to respond accordingly. Dust will be controlled by use of water/misting during crushing activities and not operating crushing equipment during high wind conditions with wind speeds estimated at 20 miles per hour or greater.

The Owner will maintain motorized process equipment and vehicles will be maintained on a regular schedule and repaired as needed. Processing equipment and vehicles will only operate when necessary, and the Owner will avoid leaving any equipment running when not in use to reduce exhaust emissions.

Since the ABC recycling area consists mainly of loose sand and gravel, stormwater is anticipated to infiltrate directly into the ground and contained and managed on Site. The facility will utilize a combination of structural stormwater controls, good housekeeping, facility personnel training, and stormwater best management practices which include the removal of sediments and accumulated material from stormwater runoff. Some structural stormwater controls will include silt fencing, a stormwater conveyance swale, sediment forebay, anti-tracking pad, and erosion control matting for areas with steep slopes. Stormwater runoff will be treated for 80 percent Total Suspended Solids? (TSS) removal and controlled appropriately.

SLT Construction will train personnel on stormwater best management practices and encouraged to enforce compliance with the operation and maintenance procedures.

Based on the closure cost estimate provided in the Application MassDEP is not requiring a Facility Assurance Mechanism (“FAM”) from the Owner at this time. Pursuant to 310 CMR 19.051(6)(a), the Owner is required to revise the estimate of the cost of closure every year and every second year submit the revised estimate to MassDEP. If at any time, after review by MassDEP, the closure cost estimate indicates a net loss, the Owner/Operator is required to establish a FAM pursuant to 310 CMR 19.051(2) [**Refer to Specific Conditions, Section VI.M**].

IV. MEPA COMPLIANCE

The project is not subject to the Massachusetts Environmental Policy Act review under the provisions of 301 CMR 11.03(9)(b)1 for solid waste activities that are categorically exempt from Site Assignment.

V. GENERAL CONDITIONS

A. Materials Received: The Operation shall not accept materials except as provided in Section VI. of this Permit.

B. Compliance:

1. The Operation shall, at all times, be in compliance with 310 CMR 16.00 including, but not limited to: 310 CMR 16.01: *General Requirements* and 310 CMR 16.05(4): *RCC Permit Conditions*. The Operation shall, at all times, be conducted in a manner that prevents an unpermitted discharge of pollutants to air, water, land or other natural resources, does not present a significant threat to public health, safety or the environment, and does not cause or contribute to a condition of public nuisance.
2. The Operation shall not cause or contribute to a condition of air pollution, including, without limitation, odors, fugitive dust and noise. The Applicant shall comply with 310 CMR 7.00 Air Pollution Control and 310 CMR 19.000 and shall implement measures to effectively prevent nuisance conditions and conditions of air pollution during operation. In the event a nuisance condition develops, abatement measures shall be implemented immediately. Pursuant to 310 CMR 7.00 and 19.000, MassDEP reserves the right to require additional equipment and/or measures to prevent or control nuisance conditions and/or conditions of air pollution.
3. The Operation shall, at all times, ensure that the quality of the incoming materials are not contaminated by toxic substances at levels which may pose a significant threat to public health, safety or the environment, and that the type and quality of the incoming materials is sufficient for the operation.
4. The Operation shall, at all times, not accumulate or store or handle materials of a nature or in quantities so as to cause or pose a threat to the public health, safety, welfare or the environment.
5. The Operation shall, at all times, ensure the proper and timely management and disposal of all residual and/or non-recyclable waste materials from the Operation.
6. The Operation shall, at all times, not be conducted in such a manner that would constitute a solid waste management facility, solid waste storage facility, or processing facility, for which a solid waste site assignment, pursuant to 310 CMR 16.00 would be required.
7. The Operation shall, at all times, be conducted or shall operate in accordance with this Permit, good management practices, and the approved plans, reports, and other submissions described in this Permit, and/or as modified by the conditions of this Permit.
8. The Owner/Operator shall provide for the routine maintenance and general cleanliness of the Operation and Site.
9. The Operator shall perform routine monitoring of the Operation and Site in accordance with the requirements of this Section and the approved plans to ensure compliance with this Permit and the approved plans. The routine monitoring shall include, without limitation, the following:
 - a. A daily assessment including, without limitation, inspection of the status and condition of the Operation, structures, equipment, devices, environmental control systems, paved surfaces, fencing, gates, and the general cleanliness of the Property.

- b. A daily materials management records tracking system, documenting all materials managed at the Site whether performed by the Operator or received from others with incoming loads.
 - c. A monthly assessment including, without limitation, inspection of the overall condition of the Site and its material storage and environmental control systems.
 - d. Documentation of the results of the routine monitoring, and any corrective actions, repairs, or maintenance in the Operation's Daily Log required by this Permit.
10. Pursuant to 310 CMR 16.01(8), failure to comply fully with the applicable provisions of 310 CMR 16.00, this Permit, or any other applicable MassDEP permits or approvals shall be a violation of 310 CMR 16.00.
11. Pursuant to 310 CMR 16.01(8), MassDEP may, whenever it has cause to believe that a violation has occurred, without limitation, rescind, suspend, revoke, or modify this Permit and/or initiate an enforcement action in accordance with applicable statutes or regulations as deemed appropriate. Pursuant to 310 CMR 16.01(8)(b)2., where a permit is rescinded, suspended or revoked by MassDEP, the owner or operator shall cease operations until:
- a. the owner or operator corrects the violation to the satisfaction of the MassDEP; or
 - b. the owner or operator applies for and obtains a site assignment and solid waste management facility permit.
- C. Compliance with Other Regulations:** This Permit does not relieve the Operator from the obligation or requirement to comply with all applicable laws and regulations (whether local, state, or federal). This Permit shall not supersede, nor otherwise diminish, the Operator's requirement to comply with other permit(s) as previously issued by the Town of Plympton, if any.
- D. Access:** Pursuant to the provisions of 310 CMR 16.01(5): *Access to Facilities and Properties*, the Operation shall be subject to periodic inspections by MassDEP without prior notice. The Operator shall, upon request, provide to MassDEP full access to all relevant information and records, as well as access to the Site/Operation for purpose of conducting such inspections, with the purpose being to determining compliance with all applicable regulations and the terms and conditions of this Permit.
- E. Request for Information:** Pursuant to the provisions of 310 CMR 16.01(5)(c): *Access to Information*, when/where deemed necessary to ascertain facts relevant to determining compliance or to actual or potential harm to public health or safety, actual or potential public nuisances, or actual or potential damage to the environment that may be caused by the handling, management, placement, storage, processing, treatment, reuse, transfer, use or disposal of solid waste or recyclable materials, MassDEP may request and any person shall furnish, within a reasonable time, any such requested information, and shall allow, MassDEP personnel or authorized representatives thereto, to have access to, copy, or take images of, any such records relating to determining compliance.
- F. Liability:** Pursuant to the provisions of 310 CMR 16.01(6): *Joint and Several Liability*, this Permit is hereby issued and is subject to the conditions of joint and several liability of the Owner and Operator.

G. Permit Transfer: Pursuant to 310 CMR 19.044, for a transferred Permit to be valid, the transferee must, within thirty (30) days of the effective date of the transfer, complete the required Certification for Transfer of a Permit, form BWP SW-49 and submit to MassDEP.

H. Permit Modifications:

1. Pursuant to 310 CMR 16.05(7)(a): *RCC Permit Modifications*, the Operator shall notify MassDEP and the Plympton Board of Health of any proposed changes in design or Operations where:
 - a. the Operator intends to recycle, compost or convert materials substantially different from those materials for which this Permit has been granted;
 - b. the design and/or management of the Operation is to be altered;
 - c. the Operator proposes to increase the volume or quantity of materials to be handled by the Operation above that volume or quantity established in the Permit; or
 - d. as otherwise specified in this Permit.
 2. Pursuant to 310 CMR 16.05(7)(b): *RCC Permit Modifications*, where MassDEP determines that the change in design or operation is significant, MassDEP may require the submittal of a revised RCC permit application, pursuant to 310 CMR 16.00 and 310 CMR 4.00, with a copy submitted to the Town of Plympton Board of Health, for review.
- I. Operations:** The Operator shall conduct all materials management activities (i.e. receiving, handling, recycling and storage) involved in the Operation within the designated areas, as described in the Application and as depicted on the submitted plans/drawings as contained therein, as well as in accordance with the applicable regulations set forth at 310 CMR 16.00. All such material management/storage areas of the Operation at the Site (including proximate surrounding areas), shall be maintained in a clean, orderly and sanitary condition in order to protect the public health, safety, welfare and the environment.
- J. Operation Interruption:** In the event the Operation is temporarily or permanently interrupted or discontinued for any reason, the Operator shall, promptly and in a timely manner, notify MassDEP of the interruption/discontinuation, and as deemed necessary, remove, recycle, or dispose of any/all remaining waste materials and products from the Site/Operation in accordance with all applicable regulations, including, but not limited to: 310 CMR 16.00 and 310 CMR 19.000.

VI. SPECIFIC CONDITIONS

- A. Amount of Material Accepted:** The Operation shall not accept more than 250 tons per day of pre-sorted, unpainted and uncoated ABC material. The quantity of residuals generated through the processing of ABC, including rejects, shall not exceed 5% by weight of the materials handled during any quarter in accordance with 310 CMR 16.05(3)(b)5.b.
- B. Amount of ABC Materials Stored:** The Operation shall not store more than 18,000 cubic yards (“cy”) of ABC material including both unprocessed and processed at any time. The amount of unprocessed and processed ABC material may not interfere with the safety of Operations and/or have the potential to impact public health, safety, or the environment.

At any time, MassDEP may request a stockpile survey, by a registered land surveyor, to verify the Operation is in compliance with storage limits.

Nothing in the above conditions A and B shall limit MassDEP's right to require removal of material from the Facility if MassDEP has cause to believe that the continued storage of material:

1. results in an unpermitted discharge to air, water, land or other natural resources;
 2. presents a threat to public health, safety or the environment; or
 3. causes or contributes to a condition air pollution, cause a public nuisance, including, without limitation, odors, fugitive dust, and noise.
- C. Residuals Storage:** The amount of "Residuals" (i.e., painted ABC, wood, metal, paper and plastic etc.) shall not exceed two 10 cubic yard roll-off containers on Site at any one time. Residuals shall only be accepted in **incidental amounts** in source separated loads. All Residuals shall be transferred to a permitted solid waste facility for recycling or disposal, as appropriate, pursuant to MassDEP regulations.
- D. No On-Site Utilization:** No utilization of crushed or processed ABC material on-Site without prior MassDEP approval.
- E. Staffing:** The Operator shall provide an adequate number of trained staff to ensure that the Operation is operated and maintained as designed, in accordance with good management practices and in accordance with the conditions set forth in this Permit.
1. During all hours of operation, the Operator shall ensure that the Operation is monitored by a manager or supervisor, who shall be knowledgeable of the plans and procedures for the proper operation and maintenance of the Operation, including, without limitation, the applicable regulatory requirements at 310 CMR 16.05, and the terms and conditions set forth in this Permit.
 2. The Operator shall ensure that all employees, and substitute employees, of the Operation, including without limitation, material inspectors, scale attendants, workers, laborers, handlers, equipment operators, and supervisors, are properly trained, licensed and/or certified to perform the functions that they are required to perform. The Operator shall maintain, at the Site, a record of employee training and a certification by the Operator demonstrating that employees have been properly trained, and that said individuals are knowledgeable in all matters regarding the applicable regulatory requirements at 310 CMR 16.05 and the requirements of this Permit, inclusive of good solid waste management practices as it pertains to the respective functions that they are required to perform. Such training certifications shall include a description of each individual's job duties and their respective trainings/certifications.
- F. Employee Facilities:** The Operator shall provide proper shelter and facilities for employees working at the Operation. The shelter and facilities shall contain:
1. sufficient light and heat;
 2. a safe drinking water supply;
 3. sanitary hand-washing and toilet facilities;
 4. an operational telephone or two-way radio system; and

5. other equipment or appurtenances necessary for full compliance with applicable local, state and/or federal worker health and safety requirements.

G. Unloading: Access to the Operation shall be limited to such periods of time as a trained attendant is on duty. The Operation shall provide for continuous supervised unloading of materials received only from authorized waste material generators, vehicles, and users. Authorized users shall unload material only at the direction of Operation staff and only at the Operation's designated off-loading container/areas.

H. Inspection of Incoming Material:

1. All incoming loads shall be visually inspected to determine the presence of unacceptable materials.
2. All loads that contain unacceptable materials shall be handled and managed in accordance with all applicable state laws and regulations including without limitation, 310 CMR 19.000, 310 CMR 7.00, 310 CMR 30.000, and 310 CMR 40.0000 and as set forth in this Permit.

The Owner shall employ a sufficient number of trained asbestos inspectors so that all incoming loads can be inspected whenever the Facility is operating. Any asbestos waste inadvertently accepted shall be managed in accordance with 310 CMR 7.00 Air Pollution Control Regulations and requirements of the Massachusetts Department of Labor Standards ("MDLS").

For each load that is accepted at the Facility where ACM is suspected to be present or the load is rejected due to the presence of suspect ACM, NEWD shall notify the MassDEP Southeast Regional Office, Solid Waste Management Section, by telephone (508-948-2828) within two (2) hours after identifying the load as containing suspect ACM.

Any work involving asbestos, including but not limited to handling, sampling, segregating, and containerizing, shall be performed only by individuals who possess the proper level of certification to perform that work. The Owner shall hire a qualified and properly certified asbestos contractor to do any and all work beyond the qualifications and certifications of Facility employees.

I. Fire Protection & Spill Control: The Operator shall take suitable measures for the prevention and control of fires and spills at the Site by complying with at least the following:

1. Ensure that no materials are placed, stored, or maintained in such a manner as to pose a fire or chemical hazard.
2. Maintain appropriate fire control and spill control equipment in working order and in all applicable areas of the Site.
3. The Operator shall be responsible for engaging fire-fighting or spill-control assistance, in the event such occurs.

J. Instruction of Employees: The Operator shall provide an adequate number of trained staff to ensure that the Operation functions and is maintained as designed, in accordance with all applicable regulations and the terms and conditions of this Permit. Without limitation, the Operator shall:

1. Instruct all employees of the requirements of this Permit, as applicable to their role. The Operator shall maintain and make available to all employees and Source Sites a

- copy of this Permit and any applicable plans, protocols or procedures for use by the employees.
2. Ensure that all employees and substitute employees of the Operation, including without limitation, inspectors, workers, handlers, equipment operators, and supervisors, are properly trained, licensed and/or certified to perform the functions that they are required to perform.
 3. Ensure that the individual(s) assigned to inspect and supervise the unloading of all vehicles delivering material shall have adequate training, knowledge and understanding of all applicable regulations and the requirements of this Permit.
 4. Certify for each employee that the employee has been properly trained in their duties and that each employee is knowledgeable regarding the requirements of this Permit, the approved plans and good solid waste management practices applicable to his or her duties. These training certifications shall include a description of each individual's job duties and training.
- K. Record Keeping and Reporting:** The Operator shall, at all times, maintain at the Site, copies of all permits, approvals, records, reports and other operational information, as deemed necessary, in order to maintain and demonstrate compliance with 310 CMR 16.00 and this Permit. These records shall be maintained on a continuous basis, for at least three (3) years. The Operator shall, upon request, make all such records and information available to authorized representatives of MassDEP and all appropriate municipal authorities. These records shall include but shall not be limited to the following:
1. Copy of Permits & Approvals – The Operator shall maintain, at the Site, and shall upon request, make available to authorized representatives of MassDEP and all applicable municipal authorities for review, a complete copy of this Permit and all approved plans, appendices, protocols and attachments, as well as all records, logs and reports as required to be maintained by this Permit.
 2. Operational Records & Daily Log – The Operator shall develop and maintain at the Site, at all times, a daily log that shall at a minimum include:
 - a. The date the log was completed;
 - b. A daily summary of all materials (itemized by material type and point of generation) received, stored, and/or shipped for recycling, re-use or disposal;
 - c. Documentation and description of the routine Site/Operation monitoring, including any corrective actions, repairs, or maintenance activities;
 - d. A description of any deviations from the approved plans and operating procedures; and
 - e. A log of any complaints received regarding the Operation including, but not limited to a description of the complaint, a description(s) of the findings of the complaint investigation, and a description of the actions taken, and/or intended to be taken to address the complaint.
 3. Annual Compliance Certification with Reporting– In order to validate that the Operation is in compliance with all applicable regulatory requirements and the terms and conditions of this Permit, the Operator shall, on an annual basis, submit to

MassDEP, no later than February 15th of each year, an annual compliance certification pursuant to the provisions and requirements of 310 CMR 16.06(1): *Compliance Certification Requirements*. Additionally, under the provisions of 310 CMR 16.05, the owner or operator of a Recycling, Composting or Conversion Operation with a written MassDEP permit is required to submit an annual report to the MassDEP by February 15th each year. The annual compliance certification and the annual report must be submitted jointly via the MassDEP electronically.

4. *Special Reporting* –The Operator shall notify MassDEP, in writing, no later than by the close of the next business day, if not sooner (as deemed required or applicable), of the following:
 - a. The discovery of any Special Waste pursuant to 310 CMR 19.000, or Hazardous Waste pursuant to 310 CMR 30.000; or Spill Incident pursuant to 310 CMR 40.0000 (the Massachusetts Contingency Plan; “MCP”); or
 - b. Any incidents or disruptions which occur at the Operation that could affect the public health, safety, environment, or the Operation; or
 - c. Any response to the Operation from other agencies, including without limitation, local authorities, the Massachusetts Department of Labor and Work Force Development (“MassDLWD”), or the United States Occupational Health and Safety Administration (“OSHA”); or
 - d. Other notification requirement(s) pursuant to other applicable laws or regulations albeit state, local, or federal.

Such notification shall be made to MassDEP’s Southeast Regional Office, 20 Riverside Drive, Lakeville, Massachusetts 02347, telephone number (508) 946-2700, FAX number (508) 947-6557. Such notification by telephone or FAX shall be followed up by a certified letter within twenty-four (24) hours. This notice shall, at a minimum, provide a description of the incident, the impact on the Operations, and a description of the actions the Operator has taken or intends to take to institute corrective measures and/or resume operations.

- L. Permit Modification by MassDEP:** MassDEP reserves the right to rescind, suspend or modify this Permit by the imposition or amendment of conditions based on determinations of any actual or potential adverse impacts from the Facility. It is the Operator’s responsibility to comply with all other applicable Federal, State and Local statutes or regulations as a pre-requisite to the operation of the Facility.

Please be advised that if this Permit is rescinded or suspended, this Facility shall be regulated under all applicable sections of Massachusetts General Laws (MGL), Chapter 111, Section 150A, and the regulations promulgated thereunder at 310 CMR 16.00 “Site Assignment Regulations for Solid Waste Facilities”, and 310 CMR 19.000 “Solid Waste Management Facility Regulations”. Failure to comply with these requirements may lead to legal action including but not limited to, criminal prosecution, court imposed civil penalties, or civil administrative penalties assessed by MassDEP.

- M. Financial Assurance Mechanism:** Pursuant to 310 CMR 19.051(6)(a) the Owner shall revise the estimate of the cost of closure every year and every second year submit the revised estimate to

MassDEP. If at any time, after review by MassDEP, the closure cost estimate indicates a net loss, the Owner/Operator shall establish a FAM pursuant to 310 CMR 19.051(2).

- N. **Third Party Inspections:** MassDEP is not requiring third party inspections of the Facility at this time. Be advised that MassDEP reserves the right to require periodic third party inspections of the Facility in the future upon written directive by MassDEP.

EFFECTIVE DATE OF THIS PERMIT DECISION

[as it would appear in any decision following the draft permit comment period]

Pursuant to the provisions of 310 CMR 16.05(5)(e), this RCC Permit decision will become final after the 21st day following the date of issuance by MassDEP as signed below, unless, a “Request for an Adjudicatory Hearing” is filed (refer to “Request for Adjudicatory Hearing” (below). In the event a “Request for an Adjudicatory Hearing” is filed, the RCC Permit decision would not become final until the Commissioner issues a final decision pursuant to 310 CMR 1.01(14): *Decisions*. Once the RCC permit decision is final, any stay of the RCC permit would be governed by M.G.L. c. 30A, §14.

The Effective Date of the RCC Permit is **DRAFT**

DURATION OF THIS PERMIT DECISION

This Permit shall terminate on **DRAFT**, unless the Permittee submits a permit renewal application to MassDEP for review and approval requesting continued operation of the conversion activity. The permit renewal application must be submitted to MassDEP on or before **DRAFT**. The permit renewal application must be submitted in accordance with the provisions and regulatory requirements of 310 CMR 16.00 and 310 CMR 4.00.

In the event that the Permittee submits a permit renewal application to MassDEP for a request to continue operation pursuant to the provisions of this section, the expiration Date shall be extended until such time MassDEP issues a final decision on the Permittee’s application for permit renewal and continued operation. Upon Permittee’s submission of a permit renewal application to MassDEP, provided the Permittee submits a complete permit renewal application in accordance with 310 CMR 16.00, the presumption associated with the permit renewal application is that MassDEP shall renew the Permit for an additional ten (10) years. As part of its review, MassDEP may supplement the Permit with additional reasonable conditions in accordance with the then-applicable provisions of 310 CMR 16.05. The permit renewal application will be governed by the provisions of 16.05(7). In the absence of other modifications described in 16.05(7)(a), neither (a) an extension of time, nor (b) additional reasonable conditions added to the Permit by MassDEP as part of its review of the permit renewal application shall be deemed to be a significant modification. In the event MassDEP denies the application for continued operation, then the Permittee shall, within ninety (90) days of the date of MassDEP’s denial of the application for continued operation, cease the Operation pursuant to the terms and conditions of the denial of the request for continued operation as well as in accordance with the terms and conditions of this Permit and the applicable regulations and requirements pursuant to 310 CMR 16.00.

In matters of noncompliance at the Site/Operation, nothing in this section shall limit MassDEP's authority to require the Permittee to cease operations as authorized by this Permit pursuant to applicable statute and regulations and requirements as afforded under 310 CMR 16.00, should such be deemed necessary.

REQUEST FOR ADJUDICATORY HEARING

Request for Adjudicatory Hearing: Any one or more of the following persons may request an adjudicatory hearing of the Permit Decision in accordance with 310 CMR 16.05(5) and (6): the applicant; any aggrieved person as defined at 310 CMR 16.02; the municipality wherein the proposed operation is to be located; a group of ten persons that has properly intervened pursuant to the requirements of 310 CMR 16.05(5)(c). Such request for an adjudicatory hearing shall be in writing and shall be filed or postmarked within 21 days from the date of issuance of the final Permit Decision.

Notice of Claim Procedure and Deadlines: The adjudicatory hearing request shall be in the form of a Notice of Claim and shall comply with all the requirements of 310 CMR 1.01, Adjudicatory Proceeding Rules for the Department of Environmental Protection. (Please refer to "Content of Notice of Claim" below).

The request must be sent to the Case Administrator at the following address:

Case Administrator
Office of Appeals and Dispute Resolution
Massachusetts Department of Environmental Protection
100 Cambridge Street, Suite 900
Boston, Massachusetts 02114

A copy of the request must also be sent to the issuing regional office of MassDEP at the following address:

Regional Director
Massachusetts Department of Environmental Protection
Southeast Regional Office
20 Riverside Drive
Lakeville, Massachusetts 02347

The person requesting the adjudicatory hearing shall also send, by first class mail or hand delivery, copies of the request to the applicant, to all recipients of the Draft permit decision, and to any other person who may have submitted written or electronic comments to MassDEP regarding the issuance of the Permit Decision. A list of such persons is contained in the "cc" list of the Permit Decision.

Filing Fee: A copy of the "Notice of Claim" and a Massachusetts DEP "Adjudicatory Hearing Fee Transmittal Form" (available through MassDEP's website), along with a valid check or money order in the amount of \$100.00 payable to the Commonwealth of Massachusetts, must also be sent to MassDEP's Lockbox at the following address:

Massachusetts Department of Environmental Protection
P.O. Box 4062

Boston, MA 02211

The Notice of Claim will be dismissed if the filing fee is not paid, unless the person filing the Notice of Claim has been determined to be exempt or has been granted a waiver concerning payment of the filing fee.

Filing-Fee Exemptions: A filing fee is not required from a city, town (or municipal agency), county, district of the Commonwealth of Massachusetts or municipal housing authority.

Filing-Fee Waivers: Pursuant to 310 CMR 4.06(2), MassDEP may waive the adjudicatory hearing filing fee for a person who demonstrates that paying the fee will create an undue financial hardship. A person seeking a waiver must file an affidavit setting forth the facts believed to support the claim of undue financial hardship along with the Notice of Claim as provided above.

Content of Notice of Claim: Pursuant to 310 CMR 16.05(6)(c), matters that may be raised in a request for an adjudicatory hearing by a person who has the right to request an adjudicatory hearing are limited to the matters raised during the public comment period; provided, however, that a matter may be raised upon a showing that it was not reasonably possible, with due diligence, to have raised such matter during the public comment process or for good cause shown.

Pursuant to 310 CMR 1.01 and 310 CMR 16.05, the Notice of Claim for adjudicatory appeal shall be dated and signed by the person on whose behalf the filing is being made or by the person's authorized representative, and shall comply with all of the requirements as stated therein, and shall, at a minimum, contain the following information:

- (1) The Department File Number (Application Transmittal Number);
- (2) The name, address, telephone and facsimile number and email address of the person filing the Notice of Claim. If the person is the applicant, please indicate if the name, address or other information has changed since the date of the application;
- (3) If represented by counsel, the name, address, telephone and facsimile number and email address of the attorney;
- (4) If the person is a municipality, a statement indicating the status of the person filing the request as a board of selectmen or mayor of a municipality wherein the proposed operation that is the subject of the Permit Decision is located and a demonstration of appropriate participation by the municipality in the permit proceedings;
- (5) If the person is an aggrieved person, a demonstration of aggrievement;
- (6) If the person is a 10-person group, a demonstration of appropriate intervention in the permit proceedings, affidavits from each group member stating his/her intent to be a part of the group and to be represented by its authorized representative, if any, and the name, address, telephone and facsimile number and email of the authorized representative, if any, and each group member;

- (7) A clear and concise statement of the facts which are grounds for the appeal, the relief sought and any additional information required by applicable law or regulation;
- (8) A copy of the Permit Decision being appealed;
- (9) A statement that a copy of the Notice of Claim has been sent to the applicant, the Department's issuing office and all persons who submitted an electronic or mailing address with timely written comments on the draft Permit Decision to the Department; and
- (10) If the matter is major or complex as defined in 310 CMR 16.05, a request to the Presiding Officer to deem the matter major or complex setting forth specific reasons supporting that request.

Should the contents of a Notice of Claim for adjudicatory appeal not meet the requirements of 310 CMR 1.01, or any other applicable regulations, the Presiding Officer may dismiss the appeal.
